

CONNISTON Trough Urinal Kits

Product Code: UR020

Conniston vandal resistant urinal kits come complete with plastic cistern, 22mm stainless steel, square sparge pipe and down pipe and 1 1/2 inch BSP waste outlet. The trough is fabricated from 304 grade, brushed stainless steel and comes with welded 3mm thick end panels and welded-on square sparge pipe. Conniston urinals can also be supplied with boxed ends, down/pipe cover and left hand, right hand or center outlet.

CHUR Individual Bowl Urinals

Product Code: UR009

The Chur urinal is an individual bowl urinal with top inlet and exposed outlet. Fabricated from 304 grade, high polished stainless steel, the Chur urinal is an ideal replacement for porcelain urinals. Pipe work is available for ranges of 1-4 units

CONNISTON Trough Urinal Kits

Product Code: UR020

Installation

The urinal trough should be fastened to the wall through the fixing holes provided. The down pipe can then be installed with the clips and connectors supplied, the cistern can then be mounted and the waste outlet connected.

Maintenance

Clean with normal toilet brush and warm soapy water. Do not use bleach or cleaners unless specifically intended for use on stainless steel.

CHUR Individual Bowl Urinals

Product Code: UR009

Installation

The Chur urinal can be hung from a screw through the cut out at the top and then fixed through the bracket on the rear. Inlet connection requires a push fit adapter, which comes with the urinal, to connect to 15mm standard pipe work. Chur urinals are also supplied with a 1 1/4" BSP waste outlet to connect to P-traps or bottle traps (not included).

Maintenance

Clean with normal toilet brush and warm soapy water. Do not use bleach or cleaners unless specifically intended for use on stainless steel.
